

PRODUCT INFORMATION

The bold look and easy installation of the Diamond Stone Cut[®] retaining wall system have long made it the obvious choice for residential and light-commercial wall projects. The two Diamond Stone Cut face styles offer a more natural appearance that increases the versatility of this landscaping classic.

Created at the request of the very contractors who rely on the rugged dependability of the Diamond[®] retaining wall system, the casual and formal faces bring warmth and character to any landscaping project. With a richly textured quarried look, these styles join the straight and beveled faces in offering all the tried-and-true features of Diamond blocks.

The rear-lip locator invented by Anchor, ensures uniform installation and reduced labor costs. Coupled with the optional step and cap accessories, the expanded versatility of Diamond walls means more design freedom than ever before.

- Minimum outside radius, measured on the top course to the front of the units: 2 feet
- Minimum inside radius, measured on the base course to the front of the units: 4 feet
- Gravity walls up to 4 feet 6 inches high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex[™] retaining wall system when designed by a qualified engineer
- ICC evaluated

**This height assumes cores are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.*
