

INTRODUCING THE NEW ANCHOR WALL ESTIMATOR

Automatically generates preliminary wall elevation, cross sections, material quantity estimate and report, and estimates GeoGrid and Gravity Retaining Walls.

- Preloaded with select Belgard® and Anchor Diamond® wall products – including Tandem™ Modular
- Estimates are based on NCMA 3rd Edition Guidelines
- Estimates walls up to 12 feet, depending on product selection
- Allows import of wall plan view to assist layout
- Allows for 3 different loading conditions, flat, 3:1 crest slope, and 250 psf live load surcharge
- Output available in both Imperial and SI units
- Automatically generates wall elevation view, cross sections, and material quantity estimate in a single report
- For preliminary feasibility and costing only. Quantities are based on quantity estimating software, not by design software. Consult with a professional engineer for final designs and quantities
